

Eva Lab

THE ART OF FURNITURE

”

*From a pencil draft to technical drawings and to the actual delivery of the idea...
The creative process inspires us and the results bring satisfaction.
That is our business in a nutshell*

Eva Bykova

About us

01

EVALAB

||

Since 1997, the company has been designing and delivering complex furniture and interior solutions of various scales and levels of complexity for both private and large corporate customers.

*We are happy to give you
a hand in designing large-scale
projects and private interiors*

|
**You have
every reason
to rely on us:**

01 /

In-House Production

We offer a full production cycle with a wide range of technologies at our own factory Lagoda by EVA LAB – one of few vintage furniture factories in Ukraine, which was founded as early as in 1947.

The factory's portfolio includes such high-profile projects as the Conference Hall of the Verkhovna Rada, the premises of the Presidential Administration of Ukraine, the Cabinet of Ministers, the Supreme Court of Ukraine, the Office of the Ambassador Extraordinary and Plenipotentiary of the Republic of Uzbekistan, the Residency of the Ambassador of Japan to Ukraine; hotels Kyiv, Slavutich, Sport, Rus, Fairmont, Holiday Inn; the casino at Premier Palace (Kharkiv).

02 /

Cutting-Edge Technology

We have a broad arsenal of over 80 units of state-of-the-art machinery made in Italy and Germany.

Some woodworking machines are quite literally one of their kind. All factors combined, this enables us to implement the most complex ideas with an accurate guarantee of schedule, quality and compliance with your project specification.

03 /

Company's Management

We are committed to the highest customer service standards, meaning we offer a customized approach to each project and support at each stage — from drawings to on-site installation and follow-up maintenance.

04 /

Team's Experience

Our undeniable advantage is our 70 years of experience and the comprehensive expertise in what we are doing.

We are proud of our team's professional skills and their continuous pursuit of growth and excellence.

By trusting in us, you are choosing the authentic values of genuine quality and our complete dedication to the business we are so fond of.

How we work

- 01 • Author's specification: your ideas and preferences.
- 02 • Design of engineering models, preparation of drawings and technical sketches.
- 03 • Planning of the manufacturing process.
- 04 • Pre-assembly with the processing of separate units.
- 05 • Carving, intarsia, art painting, stone working.
- 06 • Professional assembly with the finishing of separate units and joints.
- 07 • Service and maintenance — the warranty of quality.

Rather than selling a drab piece of commodity lacking personality, we offer you a unique and meaningful realization of your ideas combined with a meticulous approach to every detail.

Just look at some of our projects and judge for yourself.
